

ADEPT SaaS for Demand Response

Rapid Deployments with Flexible Pricing
and ROI from Day 1

Need a better way to save costs and make the most of funding sources?

ADEPT SaaS can be deployed quickly with minimal upfront fees and your organization can begin recovering operating costs from day 1. No IT support staff required. Improved trip performance is guaranteed.

With over 25 million trips performed annually ADEPT is now available to agencies that want flexible, scalable software for scheduling and dispatching fleets of all sizes with no significant capital investment.

- Real-Time & Batch Scheduling
- Real-Time AVL Integrated Dispatching
- Client Registration and Management
- Trip Booking & Administration
- Vehicle Management
- Driver Management
- Mapping & Street Management
- Reporting

Get the performance. See the results.

- Advanced software features and tools help reduce vehicle operating and driver costs.
- Self-service rider tools help lower IVR call-backs and no shows resulting in higher customer satisfaction.
- Web-based on-demand, ADEPT can be securely accessed by remote desktop without IT or ongoing support staff helping to make the most of funding sources.

"With ADEPT our productivity saw a dramatic 30% increase, while call handling time decreased by the same amount. In addition service denials dropped from 4.8% to 0%."

— New York City Transit

STEP 1

Sign Up

Minimal upfront fees. No licensing costs.
Pick and choose features available for all facets of Demand Response.

STEP 2

Integrate or Migrate Systems
